

Introductory Session (Assignment)

Theory Type Problem :

- 1.) What does “stdio” stand for in #include <stdio.h>?
- 2.) Why is #include <stdio.h> required in a C program?
- 3.) Write the basic syntax (structure) of a C program.
- 4.) What are // and /* */ used for in the C programming language?
- 5.) What is the use of \n in the C programming language?

Output Type Problem :

- 1.) Print the following output using C programming language (**Multiple printf() statement are allowed**)

```
C Programming
is very
easy to
learn
```

- 2.) Print the following output using C programming language (**Multiple printf() statements are allowed**)

```
Hello RKGIT
Students from
Batch 1
Batch 2
```

- 3.) Print the following output using C programming language (**only one printf () statement is allowed**) :

```
Hello Everyone
```

```
This is RKGIT
```

```
Batch 1
```

```
Batch 2
```

Happy Coding !!
